Completed in 2020
- **Front-end web developer nanodegree**
Completed in 2018

Interests

Hiking, traveling, reading

About Me

I'm always seeking opportunities that would help me exceed myself. I enjoy being the bridge between engineering and design and feel right at home as a front-end engineer. I'm experienced in developing and designing products for the web, from simple landing pages to full-fledged web apps.

Also, I'm currently in my second year (out of three) studying computer science at London University, the degree is online and I'm planning to transfer to on-campus in the final year.

Professional Experience

Frontend Developer @ Superwebpros

June 2017 - Present

Key responsibilities:

- Write modern, performant, maintainable code for a diverse array of client and internal projects
- Work with a variety of different languages, platforms, frameworks, and content management systems such as JavaScript, Gatsby, React, WordPress, Shopify
- Communicate with multi-disciplinary teams of engineers, designers, producers, and clients on a daily basis
